Sources: 1-Occupational Employment and Wages (OES) program survey. NOTE: Wages provided represent the median annual wage, which is the midpoint between the highest paid 50% and the lowest paid 50% of workers in that occupation.

2-LMI Projections Program: 2006-2016 job growth and replacement (total openings) for occupational and industrial employment.

*Only statewide annual wage available.

The occupational projections presented in this brochure were produced by analysts in the Labor Market Information Division of the Employment Security Commission of North Carolina. Guidelines and procedures defined by the U.S. Department of Labor's (DOL) Bureau of Labor Statistics (BLS) are used to ensure consistency in gathering and disseminating industry and occupational projections. Analysts use industrial staffing patterns data to review historical trends and to predict future employment growth or decline of an occupation within a geographical area. The accuracy of projections for individual occupations can be affected by unforeseen events occurring in the economy over the 10-year projection period; therefore, these projections should not be used as a sole source of decision-making information.
